

The Problem: Climate Change

due to greenhouse gas emissions

Boston at 3 meter sea level rise, if climate change is not halted

If we don't reduce greenhouse gases and the heat energy created by human development, the polar ice cap melts and coastal cities around the world flood

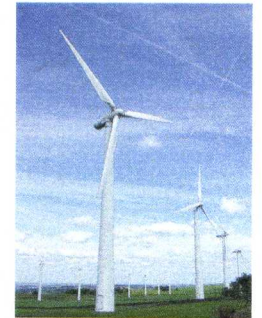

The Vision: Greening BLS, the neighborhood, and the city

The greening of Fenway area

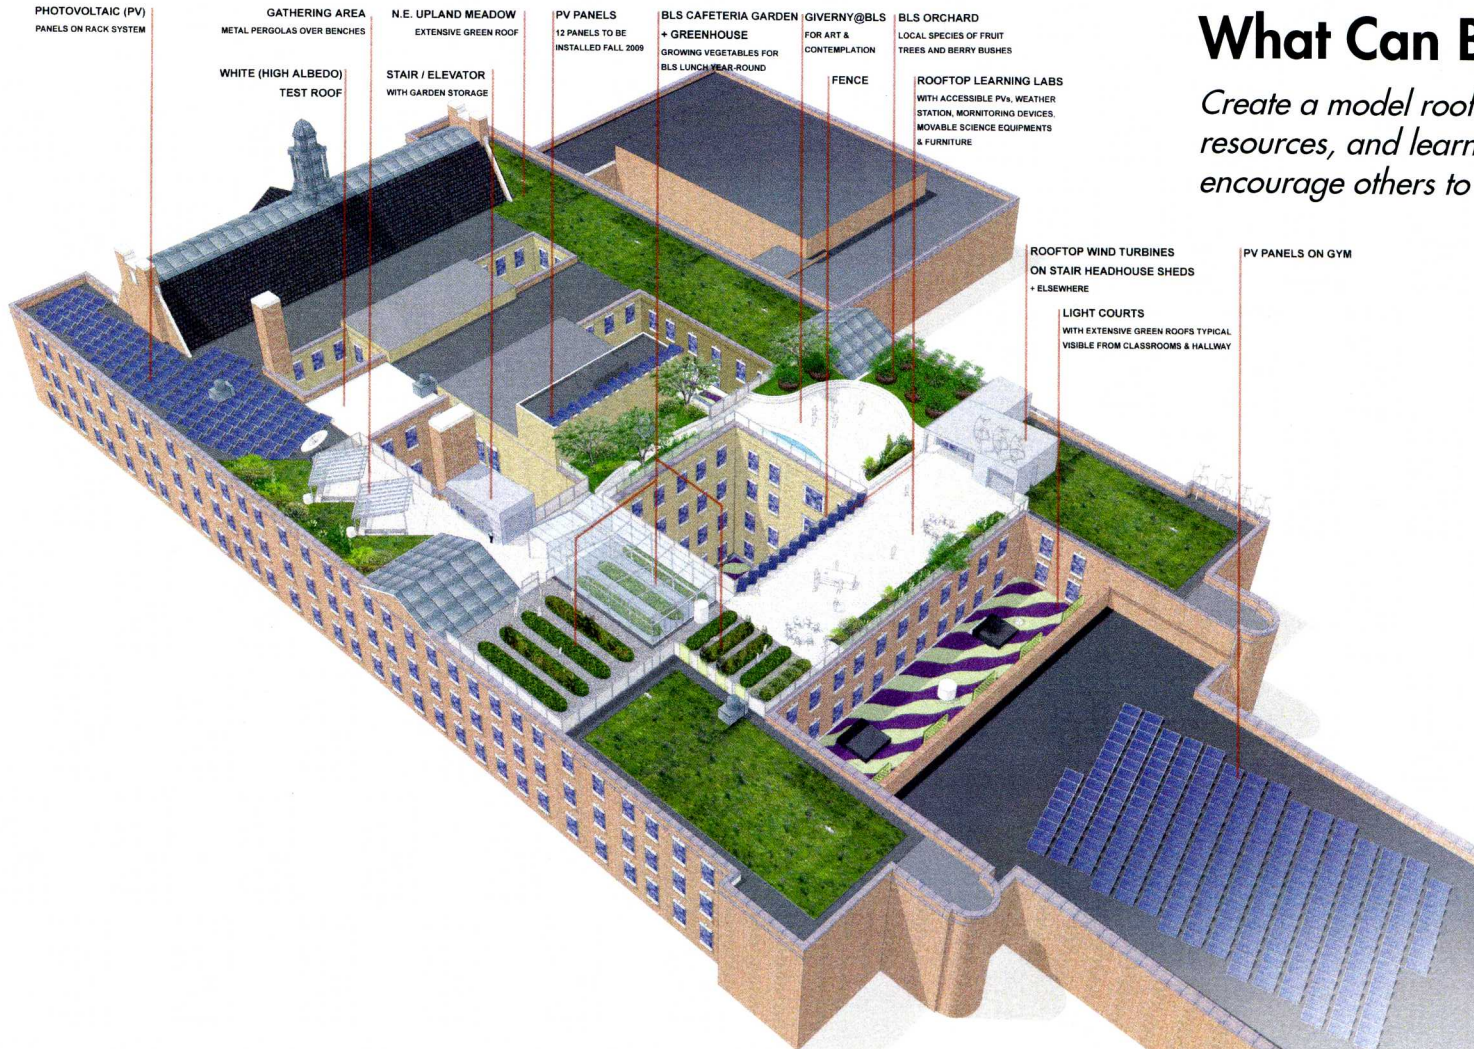

Fenway area today

Renewable energy and green rooftops can reduce CO2 emissions, improve air quality, and make our city more livable

What Can BLS Students Do?

Create a model roofscape with vegetation, renewable resources, and learning opportunities at BLS, and encourage others to follow suit
